The Bridger Formation (early and middle Eocene) consists of two members: the upper Bridger and the middle Bridger. The upper Bridger is mapped as a unit, while the middle Bridger is unmapped.

The Black Forks Member includes the Bridger Formation (upper Bridger C and D) and the Bridger Member (lower Bridger A and B). The Black Forks Member is also marked on the map.

The map shows the Bridger Fm Project Location Map and the Location of Butcher Knife Draw Quadrangle.

The map includes a Generalized Stratigraphic Section for the Black Forks Member, showing the different layers and their relationships:

- Sage Creek Limestone
- Lower Limestone
- Church Butte Limestone
- Church Butte Tuff
- Sugar White Limestone
- Whiskey Reservoir limestone
- Sage Creek limestone
- Jib Limestone
- Meadow Springs white layer
- Black Mountain turtle layer
- Golden bench limestone
